Bachelor of Technology in Information Technology                   Jaunpur, Uttar Pradesh

**BOARD OF STATE U.P.**                                                     **2018**
Satyendra Inter College                                             Pass with - (58.00%)
Intermediate                                                          Ballia, Uttar Pradesh

**BOARD OF STATE U.P.**                                                     **2016**
Satyendra Inter College                                             Pass with - (83.16%)
High School                                                          Ballia, Uttar Pradesh

## PROJECTS

**SPOTIFY-WEB PLAYER**    May 2024

Spotify Web Player is a responsive web application designed to replicate the user experience of the popular music streaming platform Spotify. Developed using front-end technologies like HTML5, CSS3, and JavaScript, this clone provides users with a familiar interface with similar functionalities.

**Features:**                              Spotify's website for reference.
- User Authentication
- Playlist creation
- Playback controls
- Responsive Design
- Integration with Spotify API

**Tech Stack:** HTML5 CSS3 & JavaScript (ES6)

**A NEXFLIX CLONE**    April 2024

In this project, I have cloned the popular streaming platform, Netflix, using HTML5 and CSS3. It aims to recreate the core functionalities and layout of Netflix's user interface.

**Features:**                              Netflix's website for reference.
- Homepage.
- User Authentication.
- Product Listings.
- Checkout Process.
- User Profiles.

**Tech Stack:** HTML5 and CSS3 tutorials and documentation.

**E-SHOPPING**    March 2024

Developed and deployed a dynamic e-commerce web application using React.js, contributing to a seamless online shopping experience for users.

**Features:**
- Homepage.
- User Authentication.
- Product Listings.
- Checkout Process.
- User Profiles.
- Privacy Policy
- Contact Us
- Shipping Information
- Returns & Exchange

**Tech Stack:** React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Material-UI, RESTful APIs.

**NEWS WEBSITE**     Dec 2023

In this project there are few news which are on the screen and if a user want know more on a particular news then he can select that news and got the description.

**Features:**

- Homepage.
- Article Pages.
- Categories.
- Multilingual Support

Create UI components for the homepage, article pages, and user authentication.

**Tech Stack:-** HTML, CSS, JavaScript. Framework (React.JS, Bootstrap)

---

## SKILLS
